YOUR BORE**

Where do you start? It is so simple!

- **All we need is a water sample from your bore to start we establish the flow rate and the pressure out of your bore.**
- **We analyse your water supply for suitability.**
- **We assess how big a machine you need.**
- **The machines are sheer simplicity and self contained!**
- **Simple pre-filtration in most cases.**

All fridge size systems to 50,000 litres

- ✓ **Microprocessor controlled with sensors to detect low pressure and high pressure to prevent damage to the pump or membranes.**
- ✓ **Digital pressure display constantly on the panel.**
- ✓ **Flow gauge advises production**
- ✓ **Auto re-start, res-start recovery and night rate operation to save on power.**
